

## The Flu Shot

Simple question? How many people can you name by name that have died of the flu? Probably not anyone. I have asked this simple question to at least 600 people over the last 6 or 7 years and only two people knew a person who had died from the flu.

Simple question two? How many people can you name that have become violently ill after receiving a flu shot. Just about everyone knows someone. I suspect that these reactions are not recorded as they should be. I have no doubt that people die of the flu. After all over 20 people are killed each year by flying champagne corks, 2900 by hippos, 30 by the family dog, 7000 from texting, hundreds by lightning, a dozen or so by sharks, etc., etc., etc. Simple question three? How many people can you name that have died of cancer. My bet is a lot. My point is simply this. If there were as many people dying of the flu as they say, then we should all know someone who has died of the flu.

In the same week the news media went on at nauseum about a few people who died from the flu in Alberta, thousands died from cancer, thousands from heart disease, thousands from diabetes, thousands from alzheimers, and thousands upon thousands were newly diagnosed with each of these deadly diseases in each and every week of the year. Yet the news media ignores this epidemic. Intelligent people would call this a mass killer pandemic. Why are so many kids so sick these days? Asthma, autism, ADHD, doped up on Ritalin because they are normal rambunctious, curious, with pepper up their butts kids.

One recent study in Great Britain studied over 63,000 kids with leukaemia to prove there was no relationship between high voltage power lines and the disease. What a bunch of dummies! Question should be is "Why do you have so many Kids with Lukemia?"

We have an epidemic of disease which has touched every family in this country and our government just doesn't get it! Yes, the same government that wants to take away your right to good quality vitamins and herbal remedies! Priorities?

The ability to establish priorities is a talent or life skill that is essential to success in any endeavour. Unfortunately our government does not have this skill. It spends billions to promote and administer free flu shots and the primary beneficiary is the drug companies. The same government that offers little for cancer research.

Then there is the so called effectiveness of the flu vaccine itself. You can read endless studies that the flu vaccine is next to completely useless to only effective in maybe 10% of cases. One recent study out of Rome said you would have to inoculate over 200 people to effectively prevent one case of influenza. How safe is the flu vaccine? Well first of all it contains 25 micrograms of mercury the most toxic non radioactive element on this planet. (Also aluminum, formaldehyde and God know what else?) If you want a neurotoxin mercury is your baby. Remember the mad hatter in Alice in wonderland? Memory loss, attention deficit disorder, hyper activity. Louis Carrol was giving you the symptoms of mercury poisoning and we don't see these obvious symptoms in our populace today. Alzheimer's disease? What else is in the flu vaccine? My eyes were opened when a family member who was forced by the Canadian Government because of his job to get a flu shot became critically ill from Guillain Barre syndrome directly caused by the flu vaccine. In 1976 Guillain Barre syndrome contracted from the flu shot, killed and crippled thousands more than died from the flu.

What else is in this flu shot that we don't know about? I believe the insert that comes with the vial of vaccine says that it has not been proven safe or effective, so why are we using it?

The polio vaccine is now believed to be one of the causes of the cancer epidemic as it contained the SV40 genome from the Rhesus monkeys it was developed on. It also contained over 40 other contaminants they discovered a little too late for comfort. ( Maurice Hilleman head of vaccine development for Merck now deceased)

Jonas Salk developer of the polio vaccine testified before congress that he believed his vaccine caused more deaths than polio itself.

The Polish polio vaccine contained the Simian immune virus from the chimpanzees it was developed on. Non irradiated or neutralized monkey kidney tissue was given on a cracker to the trial victims. It is speculated that this Simian virus mutated into HIV or Aids in humans. The location of the Belgium Congo fits the aids story quite well, but that is another quest for the truth.

What boils my blood is forcing innocent high school kids to be inoculated with this flu vaccine against their will or with threat of expulsion for failure to submit. This is in my mind a criminal and treasonist act by fascist commies and not in compliance with our Charter of Rights and Freedoms.

When the pharmaceutical companies make another gross error to add to their legacy, then hundreds of thousands of innocent trusting kids will be maimed, injured for life, or die.

It is your choice and your choice only to obtain a flu shot and not at the dictates of some bureaucrat who's wisdom and ethics should be brought into question. Why are they not telling you how to boost your immune system?

It was only a few years ago that a very prominent pharmaceutical company deliberately mixed together Spanish influenza, Avian influenza, Swine influenza, and human influenza. Then sent it to their facilities in Austria for replication on mass for distribution to 18 different countries. The Czech's did their due diligence and tested the flu vaccine on a group of ferrets. The ferrets all died. The Czech virologist immediately informed the World Health Organization, who demanded an immediate recall. It is estimated it would have killed between 2 and 4 billion if they had not caught it. (Toronto Sun) You have to understand that not all but there are some incredibly evil people in the pharma business and there are over 38 high level bioweapons labs in the US alone working to develop the most lethal diseases imaginable.

My feelings are mixed on vaccines. The concept is great but the execution of the means raises many questions. Why is that the United States that vaccinates more than any other country fallen to almost last place in child health and mortality?

Why are so many people sick and dying from diseases that were relatively obscure 50 or 60 years ago?

As a final note, observe that we have what we call the flu season. The flu virus does not take a vacation to another climate in the summer. What does happen is that we get outside and receive more vitamin D from the life giving sun that same bunch want us to fear and hide from. Vitamin D, about 5000 IU per day is to me a better flu preventer in the flu season.

As another final note, it is known that a particular cold virus will cure people of cancer ( Dr. John Bell, Ottawa Regional Cancer Centre ) so maybe the flu has another benefit to us that we are not recognizing as of yet. Could it be a natural body cleanser?
